Crime Clock

The crime clock should be viewed with care. Being the most aggregate representation of the UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Group "A" offenses. This mode of display should not be taken to imply a regularity in the commission of the offenses, rather, it represents the annual ratio of crime to fixed time intervals.

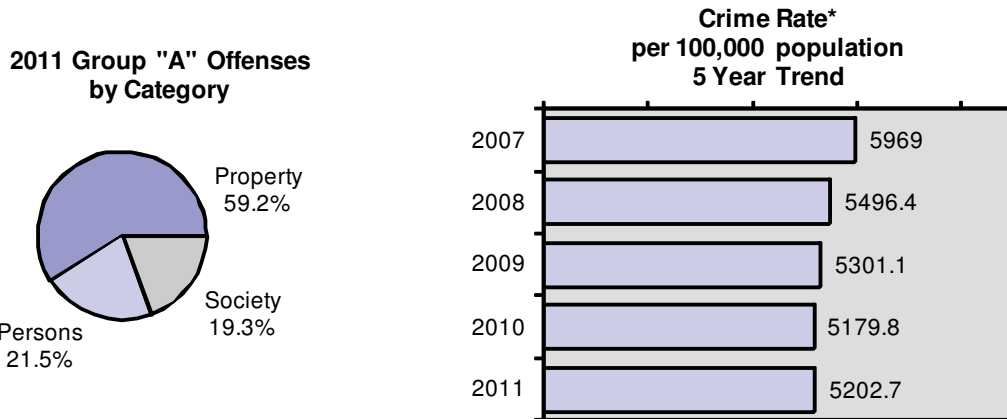

2011 Idaho Statewide Crime Profile

Group "A" Crime

The term Group "A" offenses is utilized under the National Incident Based Reporting System (NIBRS) program guidelines to identify reportable offenses committed within a crime incident. An "incident" is defined as one or more offenses committed at the same time and place by the same offender, or group of offenders that are aware of, and consent to, or assist in the commission of the crime (s). Within a single incident, up to ten distinct crime offenses are reportable.

Group "A" Offenses	
Reported Offenses	82,360
Change from 2010	2.3%
Rate per 100,000*	5202.7

State statutes must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. For reporting purposes, crime classifications are generically defined to provide a common denominator for which crime data can be uniformly measured by local, state, and federal law enforcement agencies. Therefore, nonconforming offenses outlined under Idaho state statutes should be reported according to the NIBRS definitions.
